Your Speed The SHARPLES Speed

Every member of the family turns the Separator crank at a different rate, and if you are using a fixed-feed machine, you are losing a lot of cream because of the variation of the speed. The Sharples Suction-Feed Separator will save 15% more cream than any other separator under average conditions.

SHARPLES SUCTION-FEED CREAM SEPARATOR

is the **only** separator that will skim clean at widely varying speeds.
is the **only** separator that delivers a cream of even thickness at any speed.
is the **only** separator that you can turn faster and finish skimming quicker.
is the **only** separator that has just **one** piece in the bowl—no discs, easy to clean.
is the **only** separator with knee-low supply tank and once-a-month oiling system.

SHARPLES MILKER

Leading dairymen in all countries are now using the Sharples Milker on over 400,000 dairy cows. It is the only Milker with the compressed air "Upward Squeeze," the pressure that massages the teats after each suction of milk and insures keeping the teats and udder in a healthy condition. Investigation on over 100 farms in Jefferson County, New York showed that the Sharples Milker is a third faster than any other Milker. With this Milker one man can milk 30 cows in an hour and know that the teats and udders of his cows will not be damaged in any way.

A Good Year to Make a Garden

With all kinds of eatables selling at record-breaking prices, this year is going to be a splendid year to make a garden. You can have fresh vegetables every day from your own garden at no cost, except a few dollars for seeds and an hour or two of healthful work every day or so. The one sure way to beat the "high cost of living" is to raise your own living. It costs no more to make a garden than it always did. No increase there. The garden will yield as much and just as good stuff.

Aside from the saving in money, the out-door exercise and the pleasure of tending "growing things" it will more than repay your efforts. No yard, no bit of waste land, is so small that it cannot become a luxuriant garden or a little paradise of flowers—making your home more of a home than ever.

Your Money's Worth or Your Money Back

It is agreed and understood that any seeds or other goods ordered of us may be returned at any time within ten days after receipt if not entirely satisfactory, and money will be refunded, and that we will refill at any time any garden seeds, flower seeds, or flower bulbs, with which you do not feel entirely satisfied; but we do not and cannot in any way warrant the crop, as it is dependent on so many conditions beyond our control.

1917---A GARDEN YEAR

At no time in many years has the importance and the necessity of the home garden been so great as this year. Our country is facing a critical situation in the matter of food supply, and yet it is one from which the individual can get relief, and the remedy is the home garden.

A small garden, carefully planned and tended will furnish an abundance of fresh vegetables for the home table throughout the summer.

Do not leave a furrow unturned which might grow a crop, and let every acre of land be tilled to its greatest fruitfulness. Don't hesitate to double the size of your gardens, increase your acreage in clovers, grasses and farm crops—be Prepared and you will reap a golden harvest.

The one sure way to beat the "high cost of living" is to raise your own living. It costs no more to make a garden than it always did. No increase there. The garden will yield as much and just as good stuff.

We want you to get the best results possible and will consider it a great favor to be of service to you. We look forward with pleasure to again filling your orders this season.

Sincerely yours, PINE TREE STATE SEED CO., William R. Kimball,
Bath, Pine Tree State. General Manager.

want to emphasize the superior food value of your Bobolink bean and Kelway's Mammoth Ruta Baga. Order for 1917 will be sent in early. Wishing you merited success. G. M. TWITCHELL.

Bowdoinham, Maine, Dec. 2, 1916.

We planted about 6 acres of the Ruta Baga turnips with your seed last spring. We had a hard tussle to keep the weeds down and out. Put a good deal of time into this work with the result that we got about 2000 bushels for sale and 500 bu. for sheep stock.

The seed that we had from you gave us some handsome stock, hard, yellow, sweet and of high quality. They bring a handsome price in the market. We shall want some more next spring.

Yours truly,

W. B. KENDALL, Manager,
Sagadahoc Fertilizer Co.

I want to thank you for seed that is worth the planting. I had a lot from the Government last year, but give me Pine Tree State seed every time.

Novelties and Specialties For 1917

This melon has been grown by Mr. Metcalf of Cumberland County for over twenty years, of whom we secured a small supply of seed.

The following is his description:

"More than 20 years ago, a horticultural friend told me he had been talking with a man interested in gardening who told him of a superior variety of Musk Melon he was growing. Soon after he gave him a few of the seeds, these he divided with me. We both planted them the next season with good success. After they had ripened I called at the home of my friend one evening. When he brought in a nice looking Melon and opened it, as he did so, its fine appearance and delightful odor caused him to exclaim: 'Ah! That's worth a thousand dollars.' Since then it has been known as the Thousand

About the Greenhouses We Build

For over half a century, we have been building greenhouses. Logically, then, we ought to know how greenhouses should be built.

In that fifty and more years, we have built practically all kinds of glass enclosures, from garden cold frames at a few dollars each, to conservatories, glass enclosed swimming pools, orchard houses and even orange grove glass-ins, costing up into the thousands.

It matters not whether you want just a small house, costing but a few hundred dollars, or one most pretentious; we can give you a service and a value that we think careful investigation will prove to you cannot be equalled.

We should be glad to talk with you. Send for our Two G's Booklet, or Glass Gardens, A Peep Into Their Delights.
